CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/04)

1. Project Number(s)/Environmental Log Number/Title:

Tentative Parcel Map 21090 / Environmental Log Number 08-19-001 / San Diego County Investors Otay Environmental Subdivision

- Lead agency name and address:
 County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B, San Diego, CA 92123-1666
- 3. a. Contact Valerie Walsh, Project Manager
 - b. Phone number: (858) 694-2069
 - c. E-mail: valerie.walsh@sdcounty.ca.gov.
- 4. Project location:

The project site is located in east Otay Mesa, east of State Route 125, north of Lonestar Road, and approximately 2.7 miles north of the Mexican border, San Diego County.

Thomas Brothers Coordinates: Page 1332, Grid A/7

5. Project Applicant name and address:

Corky McMillin Construction Services, Inc. 2750 Womble Road San Diego, CA 92106

6. General Plan Designation

Community Plan:

Environmentally Constrained Areas (ECA)

Land Use Designation:

Impact Sensitive (24)

Density:

1 du/4, 8, 20 acres

7. Zoning

Use Regulation:

S80

Minimum Lot Size:

6,000 square feet

Special Area Regulation:

__

8. Description of project

The project is a Tentative Parcel Map for an environmental subdivision. The project proposes to subdivide 81 acres into 4 parcels, each approximately 11.36 (Parcel 1), 10.01 (Parcel 2), 5.80 (Parcel 3), and 53.75 (Parcel 4) net and gross acres. The project site is located east of State Route 125, north of Lonestar Road, and approximately 2.7 miles north of the Mexican border. The site is also located in the Otay Ranch Conveyance Area and MSCP Hardline preserve area. The site is subject to the General Plan Regional Category (1.6) Environmentally Constrained Area (ECA), Land Use Designation (24) Impact Sensitive. Zoning for the site is (S80) Open Space Use Regulations. The site is currently undeveloped. Access to the property is provided by footpath across contiguous property under the same ownership at this time. No grading is proposed.

9. Surrounding land uses and setting (Briefly describe the project's surroundings):

Lands surrounding the project site are undeveloped and primarily used for open space and mitigation land (State Route 125 mitigation land is located to the immediate west). The topography of the project site and adjacent land is 280 to 570 feet. The site is located approximately within 1 mile of State Route 125.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	Agency
Certificate of Compliance	County of San Diego

	ntially affected by this gnificant Impact" or a '	FECTED: The environmental factors project and involve at least one Less Than Significant With st on the following pages.

☑ <u>Hazards & Haz. Materials</u>	☐ <u>Hydrology & Wate</u> Quality	☐ <u>Land Use & Planning</u>				
☐ Mineral Resources ☐ Public Services	□ Noise □ Recreation	 □ Population & Housing □ Transportation/Traffic 				
☐ <u>Utilities & Service</u> <u>Systems</u>	☐ Mandatory Finding	s of Significance				
DETERMINATION: (To be co On the basis of this initial eval	•	(gency)				
On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.						
On the basis of this Initial Study, the Department of Planning and Land Use finds that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.						
On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

INSTRUCTIONS ON EVALUATION OF ENVIRONMENTAL IMPACTS

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, Less Than Significant With Mitigation Incorporated, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Potential Significant Unless Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less Than Significant With Mitigation Incorporated," describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. The explanation of each issue should identify:
 - a) The significance criteria or threshold, if any, used to evaluate each question; and
 - b) The mitigation measure identified, if any, to reduce the impact to less than significance

I. AESTHETICS Would the project:a) Have a substantial adverse effect on a scenic vista?							
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact				
Discuss	ion/Explanation:						
A vista is a view from a particular location or composite views along a roadway or trail. Scenic vistas often refer to views of natural lands, but may also be compositions of natural and developed areas, or even entirely of developed and unnatural areas, such as a scenic vista of a rural town and surrounding agricultural lands. What is scenic to one person may not be scenic to another, so the assessment of what constitutes a scenic vista must consider the perceptions of a variety of viewer groups.							
individua not adve	ns that can be seen within a vista are vi al visual resources or the addition of str ersely affect the vista. Determining the ng the changes to the vista as a whole a	ucture level	es or developed areas may or may of impact to a scenic vista requires				
preserva subdivise change the visu	No Impact: The project site is located on undeveloped land designated for open space preservation for wildlife and biotic resources. The project is an environmental subdivision that intends on preserving the land in perpetuity and will not substantially change the composition of an existing scenic vista in a way that would adversely alter the visual quality or character of the view. Therefore, the proposed project will not have an adverse effect on a scenic vista.						
The proposed project is an environmental subdivision. The project will have no grading. The project is compatible with the existing visual environment in terms of visual character and quality because: the site will be left in perpetuity with no construction or grading proposed. Therefore, the proposed project will not have a substantial adverse effect on a scenic vista.							
The project will not result in cumulative impacts on a scenic vista because the proposed project will not change the existing scenic resources on site and does not propose development.							
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?							
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact				

State scenic highways refer to those highways that are officially designated by the California Department of Transportation (Caltrans) as scenic (Caltrans - California Scenic Highway Program). Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-of-way. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. The scenic highway corridor extends to the visual limits of the landscape abutting the scenic highway.

No Impact: Based on aerial photographs and San Diego County GIS data the proposed project is not located near or visible within the composite viewshed of a State scenic highway and will not damage or remove visual resources within a State scenic highway. The project site is located approximately 1 mile east of State Route 125 in East Otay Mesa and since this project does not propose development and will leave the land in perpetuity, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

c)	c) Substantially degrade the existing visual character or quality of the site and its surroundings?							
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact					
Discus	ssion/Explanation:							
enviro an en or gra	No Impact: The proposed project does not propose any visible alterations to the visual environment, including landform modification or construction. The proposed project is an environmental subdivision and the site will be left in perpetuity with no construction or grading proposed. Therefore, the project will not alter the existing visual character or quality of the project site and surrounding area.							
d)	d) Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?							
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact					

Discussion/Explanation	1	:
------------------------	---	---

No Impact:

The project does not propose any use of outdoor lighting or building materials with highly reflective properties such as highly reflective glass or high-gloss surface colors. Therefore, the project will not create any new sources of light pollution that could contribute to skyglow, light trespass or glare and adversely affect day or nighttime views in area.

II. AGF	RICULTURAL RESOURCES Would th	ne pro	ject:		
í li t	Convert Prime Farmland, Unique Farmla mportance (Important Farmland), as sho he Farmland Mapping and Monitoring P Agency, or other agricultural resources,	own o rogra	n the maps prepared pursuant to most the California Resources		
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discuss	sion/Explanation:				
Less Than Significant Impact: The project site has land designated as Farmland of Local Importance according to the State Farmland Mapping and Monitoring Program (FMMP). There is no evidence of agricultural use on the project site since the year 2000, which is four years prior to the last FMMP mapping date. In order to qualify for the Prime Farmland, Unique Farmland, Farmland of Statewide or Local Importance designations, land must have been cropped at some time during the four years prior to the last FMMP mapping date. Given the lack of agricultural use on the site, the designation of this area as Locally Important and Grazing Farmland by the State is likely misapplied as a result of the large scale of the Statewide mapping effort which assigns Farmland designations based on aerial photography and limited ground verification. Therefore, due to the lack of historic agricultural use at the project site, the site does not meet the definition of an agricultural resource and no potentially significant project or cumulative level conversion of Prime Farmland, Unique Farmland, or Farmland of Statewide or Local Importance to a non-agricultural use will occur as a result of this project.					
b)	Conflict with existing zoning for agricultu	ıral us	se, or a Williamson Act contract?		
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		

No Impact: The project site is zoned S80 Open Space, which is not considered to be an agricultural zone. Additionally, the project site's land is not under a Williamson Act Contract. Therefore, the project does not conflict with existing zoning for agricultural use, or a Williamson Act Contract.

1	Involve other changes in the existing entendence of Imposterial result in conversion of Imposterial resources, to non-agricultural use?	vironn ortant	nent, which, due to their location or Farmland or other agricultural			
	Potentially Significant Impact	abla	Less than Significant Impact			
	Less Than Significant With Mitigation Incorporated		No Impact			
Discus	sion/Explanation:					
designa project determ Farmla	Than Significant Impact: The project sited as Farmland of Statewide and Local was reviewed by Carl Stiehl, agriculturatined not to have significant adverse impand, Unique Farmland, Farmland of Statestural operations to a non-agricultural use	al Impo al reso acts re ewide	ortance. As a result, the proposed urces specialist, and was elated to the conversion of Prime or Local Importance or active			
Environ perpeti land us	is not an existing active agricultural oper nmental Subdivision does not propose d uity as open space. This project is unde se designation which was considered for lity. Therefore the land is restricted for u	evelor er the G public	pment and the site will be left in General Plan (24) Impact Sensitive c safety and environmental			
Therefore, the project would not represent a change in the existing environment that could result in the conversion of active agricultural operations to a non-agricultural use and no potentially significant project or cumulative level conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance, or Farmland of Local Importance to a non-agricultural use will occur as a result of this project.						
applica	R QUALITY Where available, the signable air quality management or air pollut the following determinations. Would the	ion co	ntrol district may be relied upon to			
a)	Conflict with or obstruct implementation Strategy (RAQS) or applicable portions	of the	e San Diego Regional Air Quality State Implementation Plan (SIP)?			
	Potentially Significant Impact		Less than Significant Impact			
	Less Than Significant With Mitigation Incorporated	V	No Impact			

No Impact: Operation of the project will not result in increase of criteria pollutant emissions compared to the existing use of the subject area that was anticipated by the RAQS. The project will not emit toxic air contaminants as identified by the California Air Resources Board. Therefore, the project will not conflict or obstruct with the implementation of the RAQS nor the SIP on a project or cumulative level.

b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?							
	Potentially Significant Impact		Less than Significant Impact				
	Less Than Significant With Mitigation Incorporated	$\overline{\mathbf{V}}$	No Impact				
Discussion/Explanation: In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Land Use Environment Group (LUEG) has established guidelines for determining significance which incorporate the Air Pollution Control District's (SDAPCD) established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. These screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the South Coast Air Quality Management District (SCAQMD) for the Coachella Valley (which are more appropriate for the San Diego Air Basin) are used.							
No Impact: This project does not propose any operation or activity that has the potential to create pollutant emissions. No increase in vehicular trips is anticipated as a result of the project. Further, there are no substantial grading operations associated with the construction of the project. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.							
c)	Result in a cumulatively considerable new which the project region is non-attainment ambient air quality standard (including requantitative thresholds for ozone precure	nt und eleasi	der an applicable federal or state ng emissions which exceed				
	Potentially Significant Impact		Less than Significant Impact				
	Less Than Significant With Mitigation Incorporated	\Box	No Impact				

San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O₃). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM₁₀) under the CAAQS. O₃ is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM₁₀ in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

No Impact: The project does not propose any construction and/or operation that have the potential to emit any criteria air pollutants. No increase in vehicular trips is anticipated as a result of the project. Further, there are no substantial grading operations associated with the construction of the project. As such, the project will not result in the in a cumulatively considerable net increase of PM_{10} , or any O_3 precursors.

			• • •				
d)	Expose sensitive receptors to substantia	ıl pollu	utant concentrations?				
	Potentially Significant Impact		Less than Significant Impact				
	Less Than Significant With Mitigation Incorporated		No Impact				
Discus	sion/Explanation:						
Air quality regulators typically define sensitive receptors as schools (Preschool-12 th Grade), hospitals, resident care facilities, or day-care centers, or other facilities that may house individuals with health conditions that would be adversely impacted by changes in air quality. The County of San Diego also considers residences as sensitive receptors since they house children and the elderly							
source determ the pro associ	No Impact: Based aerial photographs and GIS data sensitive receptors and point sources of toxic emissions have not been identified within a quarter-mile (the radius determined by the SCAQMD in which the dilution of pollutants is typically significant) of the proposed project. Furthermore, no point-source emissions of air pollutants are associated with the project. As such, the project will not expose sensitive populations to excessive levels of air pollutants.						
e)	Create objectionable odors affecting a s	ubsta	ntial number of people?				
	Potentially Significant Impact		Less than Significant Impact				
	Less Than Significant With Mitigation Incorporated	V	No Impact				

No Impact: No potential sources of objectionable odors have been identified in association with the proposed project. As such, no impact from odors is anticipated.

<u>IV. </u>	BIOLOG	<u> GICAL</u>	RE	<u> SC</u>	URC	<u>ES</u>	W	oulo	the	proje	ect:
									0.4.1		

a)	Have a substantial adverse effect, either on any species identified as a candidate local or regional plans, policies, or regularish and Game or U.S. Fish and Wildlife	direct, sens	tly or through habitat modifications, sitive, or special status species in , or by the California Department of
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:

The	atrix c hat no tal sul	of Sensitive Species, and site on native vegetation communities or odivision and all existing biotic and

Have a substantial adverse effect on any riparian habitat or other sensitive b) natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?

substantial adverse effect on any candidate, sensitive, or special status species and

would not contribute to cumulative impacts to these designated species.

	_	Less than Significant Impact
Less Than Significant With Mitigation Incorporated	$\overline{\checkmark}$	No Impact

Discussion/Explanation:

No Impact:

Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species and site photos, County staff biologist has determined that the proposed project will not impact any riparian habitat or other sensitive natural communities as defined by the County of San Diego Multiple Species Conservation Program (MSCP), County of San Diego Resource Protection Ordinance (RPO), Natural Community Conservation Plan (NCCP), Fish and Game Code, Endangered Species Act, Clean Water Act, or any other local or regional plans, policies or regulations because the project does not propose any development and will perpetuate the existing biological and wildlife resources on site as open space preserve

land. Therefore, the project will not have a substantial adverse effect on any riparian habitat or other sensitive natural community.					
c)	Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				
	Potentially Significant Impact		Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated	$\overline{\mathbf{V}}$	No Impact		
Discus	ssion/Explanation:				
No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species and site photos, County staff biologist has determined that the proposed project will not impact any wetlands as defined by Section 404 of the Clean Water Act, including, but not limited to, marsh, vernal pool, stream, lake, river or water of the U.S. because the project is an environmental subdivision and does not propose any development to the site. Therefore, no impacts will occur to wetlands defined by Section 404 of the Clean Water Act and under the jurisdiction of the Army Corps of Engineers.					
d)	Interfere substantially with the movement or wildlife species or with established na corridors, or impede the use of native wi	tive re	esident or migratory wildlife		
	Potentially Significant Impact		Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated	\checkmark	No Impact		
D'	i/Flamatiam				

No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species and site photos, County staff biologist has determined that the site will not disturb any native vegetation or habitats because the site will not be developed with the intent of maintaining the land in perpetuity for the site's biological and wildlife resources. Therefore, the project would not interfere with the movement of any native resident or migratory fish or wildlife species, or established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites.

e)	Conflict with the provisions of any adopte Communities Conservation Plan, other a conservation plan or any other local policesources?	approv	ed local, regional or state habitat				
	Potentially Significant Impact		Less than Significant Impact				
	Less Than Significant With Mitigation Incorporated		No Impact				
The p and o addition further Commonse Manag biolog Biolog	Discussion/Explanation: The proposed Otay Environmental Subdivision is compatible with all applicable plans and ordinances because no habitat will be impacted as a result of this project. In addition, refer to the attached Ordinance Compliance Checklist dated April 24, 2008 for further information on consistency with any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan, including, Habitat Management Plans (HMP), Special Area Management Plans (SAMP), or any other local policies or ordinances that protect biological resources including the Multiple Species Conservation Program (MSCP), Biological Mitigation Ordinance, Resource Protection Ordinance (RPO), Habitat Loss Permit (HLP).						
<u>V. Cl</u> a)	JLTURAL RESOURCES Would the pro Cause a substantial adverse change in t as defined in 15064.5?		nificance of a historical resource				
	Potentially Significant Impact		Less than Significant Impact				
	Less Than Significant With Mitigation Incorporated		No Impact				
Discu	ssion/Explanation:						
No Impact: The project will not impact historical resources, because no grading is proposed for this environmental subdivision. Moreover, the site is vacant of buildings and does not support historical resources of any kind.							
b)	Cause a substantial adverse change in resource pursuant to 15064.5?	the sig	gnificance of an archaeological				
	Potentially Significant Impact		Less than Significant Impact				
	Less Than Significant With Mitigation Incorporated	$\overline{\checkmark}$	No Impact				

Discuss	ion/Explanation:				
disturbir	act: ject does not propose nor is there any renge activities whatsoever. Therefore, the blogical resources.	eason re will	able expectation of any ground I not be any potential for impacts to		
c) E	e) Directly or indirectly destroy a unique geologic feature?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discuss	ion/Explanation:				
which g some fe	San Diego County has a variety of geologic environments and geologic processes which generally occur in other parts of the state, country, and the world. However some features stand out as being unique in one way or another within the boundaries of the County.				
	act: The project will not directly or indire the proposed environmental subdivisions.				
d) [Directly or indirectly destroy a unique pa	leonto	ological resource or site?		
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discuss	sion/Explanation:				
the proj	act: A review of the County's Paleonto ect is located entirely on plutonic igneoung fossil remains.				
,	e) Disturb any human remains, including those interred outside of formal cemeteries?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discuss	sion/Explanation:				

No Impact:

The project does not propose nor is there any reasonable expectation of any ground disturbing activities whatsoever. Therefore, there will not be any potential for disturbance of interred human remains.

VI. G	EOI	OGY AND SOILS Would the project	ct:	
a)	Ex	pose people or structures to potential cof loss, injury, or death involving:		antial adverse effects, including the
	i.	Rupture of a known earthquake far Alquist-Priolo Earthquake Fault Zo for the area or based on other sub Refer to Division of Mines and Ge	oning ostant	Map issued by the State Geologist ial evidence of a known fault?

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?

☐ Potentially Significant Impact
☐ Less Than Significant With Mitigation
☐ No Impact

Discussion/Explanation:

Less than Significant: The proposed environmental subdivision will only create lots for future mitigation land and not change the existing environment because the project does not propose development. The project does not involve issues related to people or structure. The project is not putting any structures or people at long-term risk.

e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

		Less than Significant Impact
Less Than Significant With Mitigation Incorporated	$\overline{\mathbf{V}}$	No Impact

Discussion/Explanation:

No Impact:

The project is for an environmental subdivision. The project does not propose any septic tanks or alternative wastewater disposal systems since no wastewater will be generated.

VII. HAZARDS AND HAZARDOUS MATERIALS -- Would the project:

a) Create a significant hazard to the public or the environment through the routine transport, storage, use, or disposal of hazardous materials or wastes or through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

	Potentially Significant Impact		Less than Significant Impact		
	Potentially Significant Unless Mitigation Incorporation	V	No Impact		
Discuss	ion/Explanation:				
No Impact: The project will not create a significant hazard to the public or the environment because it does not propose the storage, use, transport, emission, or disposal of Hazardous Substances, nor are Hazardous Substances proposed or currently in use in the immediate vicinity. In addition, the project does not propose to demolish any existing structures onsite and therefore would not create a hazard related to the release of asbestos, lead based paint or other hazardous materials from demolition activities.					
b) E	Emit hazardous emissions or handle haz substances, or waste within one-quarter	zardo mile	us or acutely hazardous materials, of an existing or proposed school?		
	Potentially Significant Impact		Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated		No Impact		
Discuss	sion/Explanation:				
No Imp The pro Therefo	pact: oject is not located within one-quarter mi ore, the project will not have any effect o	ile of on an	an existing or proposed school. existing or proposed school.		
compile been su	Be located on a site which is included or ed pursuant to Government Code Section ubject to a release of hazardous substan ant hazard to the public or the environm	n 659 nces	962.5, or is otherwise known to have		
	Potentially Significant Impact		Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated		No Impact		
Discus	sion/Explanation:				

Less than Significant Impact With Mitigation Incorporated: Based on a GIS review and records search, the project site has been subject to a release of hazardous substances that would create a significant hazard to the public or environment. The project site is located partially within the Brown Field Formerly Used Defense Site (FUDS), which is listed in the Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program Database ("CalSites" Envirostor Database) compiled pursuant to Government Code Section 65962.5.

The Former Brown Field Bombing Range is a 510-acre site located two miles northeast of Brown Field Air Field. The property was used by Navy between 1942 and 1960, as a dive-bombing target and later as an aerial rocket range. The primary hazard issue onsite is the likely presence of unexploded ordnance (UXO) The Army Corps of Engineers (ACOE) is responsible for investigating and remediating the site. The ACOE has already conducted an Archive Search Report and a Site Investigation on the site, as part of their investigation/ remediation process. Since further action has been deemed necessary, the next step will be a Remedial Investigation/ Feasibility Study (RI/FS), which will determine what kind of Remedial Action should be taken. The RI/FS will occur sometime after 2010, and the Remedial Action will occur sometime after that.

During the ACOE Site Investigation, fragments of practice bombs and rocket debris were observed at the Brown Field Bombing Range. Although the survey did not pass through the project site, munitions debris was observed 500 feet from the project site. The ACOE classifies the practice bomb signals used on site as a moderate severity hazard, meaning they "may cause major injury to an individual if detonated by an individual's activities." Pending further investigation, UXO is assumed to be present on and below the ground surface. This is a risk for anyone entering the site, whether for biological surveys, continuing maintenance, or other activities. The risk of major injury is a significant impact, and as such must be mitigated.

The following conditions of approval shall be applied to the project in order to mitigate the risk of injury to a level less than significant:

- Any Resource Management Plan or maintenance and monitoring plan created for this site, if it is created before the ACOE Remedial Action is completed, shall require biologists and other staff working on the site to be notified of the unexploded ordinance (UXO) hazard and be accompanied at all times by a trained UXO Technician who meets US Army Corps of Engineers UXO qualification standards with documented completion of formal US military Explosive Ordnance Disposal training.
- Prior to issuance of the Certificate of Compliance, the applicant shall submit to the Department of Planning and Land Use evidence that permanent warning signs have been placed to alert the public of the UXO hazard. Signs should be placed in all locations where the public could access the property, including roads, trails, and footpaths. Evidence shall include photographs of a sign placed on the project site and a stamped, signed statement from a California Registered Engineer, or licensed surveyor that permanent signs have been placed on the property boundaries in accordance with the requirements of this condition. The signs must be corrosion resistant, a minimum of 6" x 9" in size, on posts not less than three (3) feet in height from the ground surface, and must state the following:

"DANGER Unexploded Ordinance Keep Out

d)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				
		Potentially Significant Impact		Less than Significant Impact	
		Less Than Significant With Mitigation Incorporated	$\overline{\mathbf{V}}$	No Impact	
Dis	cuss	ion/Explanation:			
No Impact: The project is located within two miles of the Brown field Municipal Airport, however, the proposed environmental subdivision will not develop the land and will simply perpetuate the existing resources on site for future use as mitigation land therefore the project will not be a safety hazard for people residing or working in the project area because it does not propose any land development exposing people for such uses. e) For a project within the vicinity of a private airstrip, would the project result in a					
-,	S	safety hazard for people residing or world	king ir	the project area?	
		Potentially Significant Impact		Less than Significant Impact	
		Less Than Significant With Mitigation Incorporated		No Impact	
Discussion/Explanation:					
No Impact: The proposed environmental subdivision will not develop the land and will simply perpetuate the existing resources on site for future use as mitigation land therefore the project will not be a safety hazard for people because it does not propose any land development. In addition, the proposed project is not within one mile of a private airstrip. As a result, the project will not change the existing conditions that would					

constitute a safety hazard for people residing or working in the project area because it

does not propose any land development exposing people for such uses.

f)) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?				
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:					
No Impact: The project does not propose any structures.					
	The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.				

i. OPERATIONAL AREA EMERGENCY PLAN AND MULTI-JURISDICTIONAL

Less Than Significant Impact: The Operational Area Emergency Plan is a comprehensive emergency plan that defines responsibilities, establishes an emergency organization, defines lines of communications, and is designed to be part of the statewide Standardized Emergency Management System. The Operational Area Emergency Plan provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The Multi-Jurisdictional Hazard Mitigation Plan includes an overview of the risk assessment process, identifies hazards present in the jurisdiction, hazard profiles, and vulnerability assessments. The plan also identifies goals, objectives and actions for each jurisdiction in the County of San Diego, including all cities and the County unincorporated areas. The project will not interfere with this plan because it will not prohibit subsequent plans from being established or prevent the goals and objectives of existing plans from being carried out.

ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

No Impact: The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

iii. OIL SPILL CONTINGENCY ELEMENT

HAZARD MITIGATION PLAN:

No Impact: The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

No Impact: The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

v. DAM EVACUATION PLAN

No Impact: The Dam Evacuation Plan will not be interfered with because the project is not located within a dam inundation zone.

g) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?					
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated	\Box	Less than Significant Impact No Impact	
Dis	scuss	sion/Explanation:			
pe pro de ex	No Impact: The proposed environmental subdivision will not develop the land and will perpetuate the existing resources on site for future use as mitigation land therefore the project will not expose people or structures because it does not propose any land development. The Otay environmental subdivision will not place any structures or expose people to the potential risk or loss from wildland fires because no development is proposed, significantly reducing the risk of human exposure.				
h)	h) Propose a use, or place residents adjacent to an existing or reasonably foreseeable use that would substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies, which are capable of transmitting significant public health diseases or nuisances?				
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

No Impact: The project does not involve or support uses that allow water to stand for a period of 72 hours (3 days) or more (e.g. artificial lakes, agricultural irrigation ponds). Also, the project does not involve or support uses that will produce or collect animal waste, such as equestrian facilities, agricultural operations (chicken coops, dairies etc.), solid waste facility or other similar uses. Therefore, the project will not substantially

.

increase current or future resident's exposure to vectors, including mosquitoes, rats or flies.

	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact:

The proposed project is subject to the Regional Land Use Element Policy Environmentally Constrained Areas and General Plan Land Use Designation Impact Sensitive (24). The General Plan requires minimum gross parcel sizes of four, eight, and twenty acres and not more than 0.25, 0.125, and 0.05 dwelling units per acre, respectively. The proposed project has gross parcel sizes of 11.36, 10.01, 5.80, and 53.75 and densities that are consistent with the General Plan because the subject property is in the (24) Impact Sensitive Designation of the General Plan and each parcel shall contain a minimum gross area of 4, 8, and 20 acres for parcels with an average slope that does not exceed 25 percent, the average slope is greater than 25 percent and does not exceed 50 percent, and the average slope is greater than 50 percent, respectively. The proposed parcels are 11.36 acres with an average slope of 35 percent (Parcel 1), 10.01 acres with an average slope of 11 percent (Parcel 2), 5.80 acres with an average slope of 2 percent (Parcel 3), and 53.75 acres for Parcel 4. The project is subject to and consistent with the policies of the Otay Ranch Subregional Plan, Volume 2 (October 28, 1993), the Otay Ranch Resource Management Plan (October 28, 1993), the Otay Ranch Phase 2 Resource Management Plan (June 4, 1996) as amended, and the County of San Diego Multiple Species Conservation Program (1997). The current zone is S80 Open Space, which requires a net area of no

less than 6,000 square feet. The proposed project is consistent with the Zoning Ordinance requirements for minimum lot size because no lot is smaller than 6,000 square feet.

X. MIN	ERAL RESOURCES Would the proje	ect:			
a) F	Result in the loss of availability of a knowalue to the region and the residents of the resident of the residents of the resident of the residents of the resident of the residents of the reside	vn mir

	Potentially Significant Impact	$ \overline{\checkmark} $	Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated		No Impact		
Discuss	sion/Explanation:				
Logo Ti	han Significant Impact: The project s	ita ie z	zoned S80, which is not considered		

Less Than Significant Impact: The project site is zoned S80, which is not considered to be an extractive use zone (S82). However, the proposed project will not result in the loss of locally important mineral resources because open space is a permitted use within the S80 zone and will not create a conflict with the future accessibility of the mineral resource.

Therefore, no potentially significant loss of availability of a known mineral resource of locally important mineral resource recovery (extraction) site delineated on a local general plan, specific plan or other land use plan will occur as a result of this project.

XI. NOISE -- Would the project result in:

a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

	-	eact: The proposed environmental subclate the existing resources on site for fur		•		
d)	Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?					
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
	Disc	cussion/Explanation:				
	No Impact: The proposed project will not alter traffic patterns, roadway design, or place incompatible uses (e.g., farm equipment) on existing roadways.					
	e) Result in inadequate emergency access?					
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discussion/Explanation:						

No Impact:

The proposed project will not result in inadequate emergency access. No road improvements, fire requirements, or structures will be developed as a result of this environmental subdivision.

	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
iscuss	sion/Explanation:				
o Impact: No on-site or off-site parking is required or proposed. The proposed roject is an environmental subdivision. Thus, parking will not result in an insufficient apacity on-site or off-site.					
	Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?				
	Potentially Significant Impact		Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated		No Impact		
Disc	cussion/Explanation:				
No Impact: The proposed project is an Environmental Subdivision. The implementation will not result in any construction or new road design features; therefore, will not conflict with policies regarding alternative transportation.					
) !	TILITIES AND SERVICE SYSTEMS Exceed wastewater treatment requiremed Quality Control Board?				
	Potentially Significant Impact		Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated	V	No Impact		

No Impact: The project does not involve any uses that will discharge any wastewater to sanitary sewer or on-site wastewater systems (septic). Therefore, the project will not exceed any wastewater treatment requirements.

Require or result in the construction of new water or wastewater treatment b) facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?

	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			
Discuss	sion/Explanation:					
treatme	No Impact: The project does not include new or expanded water or wastewater treatment facilities. In addition, the project does not require the construction or expansion of water or wastewater treatment facilities.					
€	c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?					
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			
Discuss	sion/Explanation:					
No impact: The project does not include new or expanded storm water drainage facilities. Moreover, the project does not involve any landform modification or require any source, treatment or structural Best Management Practices for storm water. Therefore, the project will not require any construction of new or expanded facilities, which could cause significant environmental effects.						
,	d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?					
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			
Discussion/Explanation:						
No Impact: The proposed project does not involve or require water services from a water district. The project is for an environmental subdivision that will not rely on water						

e) Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

service for any purpose.

	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	ion/Explanation:			
wastew	act: posed project for a environmental subd ater; therefore, the project will not interfors service capacity.

	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			
No Impact: The project is for a environmental subdivision and will not generate any solid waste nor place any burden on the existing permitted capacity of any landfill or transfer station within San Diego County.				
g) Comply with federal, state, and local statutes and regulations related to solid waste?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				
No Impact: The project is for a environmental subdivision and will not generate any solid waste nor place any burden on the existing permitted capacity of any landfill or transfer station within San Diego County. Therefore, compliance with any Federal, State, or local statutes or regulation related to solid waste is not applicable to this				

XVII. MANDATORY FINDINGS OF SIGNIFICANCE:

project.

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range

	of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				
	Potentially Significates Than Signification Incorporated	-			Less than Significant Impact No Impact
Discuss	sion/Explanation:				
Per the instructions for evaluating environmental impacts in this Initial Study, the cotential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining evels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory were considered in the response to each question in sections IV and V of this form. In addition to project specific impacts, this evaluation considered the projects potential for significant cumulative effects. There is no substantial evidence that there are biological or cultural resources that are affected or associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?					
☐ Potentially Significant Impact ☐ Less than Significant Impact					Less than Significant Impact
	Less Than Signification	ant With Mitig	ation	$\overline{\mathbf{V}}$	No Impact
Discus	sion/Explanation:				
	lowing list of past, pr of this Initial Study:	esent and fut	ture pro	jects	were considered and evaluated as
Туре		Number	Status		Project Name
	y Adjustment with te of Compliance	07-0091	Done		McMillan Construction Services Boundary Adjustment with Certificate of Compliance
	ry Adjustment with te of Compliance	07-0108	Done		Corky McMillan Construction Services Boundary Adjustment with Certificate of Compliance

Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there is no substantial evidence that there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

c)	Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?				
□	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there were determined to be potentially significant effects to human beings related to the following Hazards and Hazardous Materials. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes biologists and anyone accessing the site to be accompanied at all times by a trained unexploded ordinance (UXO) Technician who meets US Army Corps of Engineers UXO qualification standards with documented completion of formal US military Explosive Ordinance Disposal training and applicant shall submit to the Department of Planning and Land Use evidence that permanent warning signs have been placed to alert the public of the UXO hazard. Signs should be placed in all locations where the public could access the property, including roads, trails, and footpaths. As a result of this evaluation, there is no substantial evidence that, after mitigation, there are adverse effects to human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
